Massage Therapy:

*Swedish Massage: This type of massage is very relaxing and unobtrusive. Swedish massage improves circulation, relieves stress, reduces muscle tension, and promotes a general well-being.

*Therapeutic Massage: This type of massage is much deeper than our Swedish massage. Therapeutic massage is offered to aid in relief of pain found primarily in your back, neck, and shoulders.

*Hot Stone Massage: Traditional swedish massage is enhanced by use of warm polished basalt stones. The heat penetrates deeply into muscles, melting away layers of tension and stress.

*Body Contouring: Body wrap formulated with pure and natural ingredients which gently and safely rid the body of trapped wastes by helping to stimulate the body's eliminatory functions, increase circulation and lymphatic cleansing, and control edema. A loss of 4-14 inches in each wrap is achieved. This product does not cause dehydration or water loss.
